

Project Development Phase Model Performance Test

Date	03 October 2026
Team ID	SWTID-2026-6763
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	10 Marks

Model Performance Testing:

S.No	Parameter	Screenshot/Values
1	Data Rendered <i>Project equivalent: Incident table / form loaded in ServiceNow</i>	
2	Data Preprocessing <i>Project equivalent: fields prepared for the form</i>	
3	Utilization of Data Filters <i>Project equivalent: UI Policy conditions</i>	

4

DAX Queries Used

Project equivalent:
Client Script logic

The screenshot shows the ServiceNow 'Client Script' configuration page. The left sidebar contains a navigation menu with options like 'Platform', 'Incident', 'Change', 'Problem', 'Knowledge', and 'System Administration'. The main area is titled 'Client Script' and includes fields for 'Name' (Validate Close Code), 'Table' (Incident), 'Type' (onChange), and 'Active' (checked). Below these fields is a 'Script' editor with a JavaScript function that checks the 'close_code' field and sets mandatory status for 'close_code' and 'close_notes' based on the value.

```
1 function onChange(control, oldValue, newValue, isLoading, isTemplate) {  
2   if (!isLoading || newValue !== '') return;  
3   if (newValue == '6') {  
4     g_form.setMandatory('close_code', true);  
5     g_form.setMandatory('close_notes', true);  
6   } else {  
7     g_form.setMandatory('close_code', false);  
8     g_form.setMandatory('close_notes', false);  
9   }  
10 }  
11
```

Dashboard Design

Project equivalent:
UI Policy and
Client Script lists

The screenshot shows the ServiceNow 'Incidents' dashboard. It features a search bar, a filter for 'State is Resolved', and a table of incidents. The table columns include Number, State, Priority, Short description, Assigned to, and Close code. The incidents listed are all in a 'Resolved' state with various descriptions and assigned users.

Number	State	Priority	Short description	Assigned to	Close code
INC0010001	Resolved	1 - Critical	Application not responding	Alice Johnson	Solved (Permanently)
INC0010002	Resolved	2 - High	VPN connection failure	Bob Smith	Solved (Permanently)
INC0010003	Resolved	3 - Moderate	Email not syncing	Carol Davis	Solved (Permanently)
INC0010004	Resolved	4 - Low	Password reset request	David Wilson	Solved (Permanently)
INC0010005	Resolved	3 - Moderate	Software installation issue	Eva Martin	Solved (Permanently)
INC0010006	Resolved	2 - High	Printer not working	Frank Thomas	Solved (Permanently)
INC0010007	Resolved	4 - Low	Request for new laptop	Grace Lee	Solved (Permanently)
INC0010008	Resolved	3 - Moderate	Network latency	Henry Clark	Solved (Permanently)
INC0010009	Resolved	4 - Low	Access to shared folder	Ivy Walker	Solved (Permanently)
INC0010010	Resolved	2 - High	System reboot required	Jack King	Solved (Permanently)

Report Design

Project equivalent:
observed form
behaviour

The screenshot shows the ServiceNow 'Incident' form for incident INC0010011. The form includes fields for Number, Caller, Category, Subcategory, Configuration item, Close code, and Description. It also has a 'Details' tab and a 'Work Notes' tab. The 'Close code' field is mandatory when the state is 'Resolved'. The 'Description' field contains the text: 'User is unable to access the college portal. Getting error 500.'
