

Project Development Phase Model Performance Test

Date	03 October 2026
Team ID	SWTID-2026-6763
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	10 Marks

Model Performance Testing:

S.No.	Parameter	Values	Screenshot																																				
1.	Model Summary <i>Project equivalent: solution summary</i>	UI Policy and Client Script based control of the ServiceNow Incident form: UI Policies make fields mandatory, read-only or visible, and Client Scripts display messages and validate entries. Note: If the entered data matches the configured conditions, the form behaves as designed and the incident is saved; otherwise an error or mandatory-field message is shown.	ServiceNow • Incident UI Policy and Client Script configuration UI Policy — State is Resolved <table><tr><td>Table</td><td>Incident</td></tr><tr><td>Condition</td><td>State is Resolved</td></tr><tr><td>Reverse if false</td><td>Yes</td></tr><tr><td>Active</td><td>Yes</td></tr></table> UI Policy Actions <table><tr><td>Short description</td><td>Read-only = True</td></tr><tr><td>Description</td><td>Read-only = True</td></tr><tr><td>Category</td><td>Read-only = True</td></tr></table> Client Script — onSubmit Validation Validates mandatory fields and displays an error message before submission.	Table	Incident	Condition	State is Resolved	Reverse if false	Yes	Active	Yes	Short description	Read-only = True	Description	Read-only = True	Category	Read-only = True																						
Table	Incident																																						
Condition	State is Resolved																																						
Reverse if false	Yes																																						
Active	Yes																																						
Short description	Read-only = True																																						
Description	Read-only = True																																						
Category	Read-only = True																																						
2.	Accuracy <i>Project equivalent: test pass rate</i>	Test Accuracy - 100% (8 of 8 test cases passed) Validation Accuracy - 100% (manual validation on the Incident form)	ServiceNow • UAT Test Execution Validation summary — Incident form Validation Accuracy — 100% Total Test Cases 8 Passed 8 Failed 0 Accuracy 100% UAT Test Summary <table><tr><th>Test Case</th><th>Scenario</th><th>Result</th><th>Validation</th></tr><tr><td>TC-01</td><td>Resolved state</td><td>PASS</td><td>Fields become read-only</td></tr><tr><td>TC-02</td><td>Open state</td><td>PASS</td><td>Fields remain editable</td></tr><tr><td>TC-03</td><td>Mandatory blank</td><td>PASS</td><td>Error message displayed</td></tr><tr><td>TC-04</td><td>Valid field</td><td>PASS</td><td>Submission accepted</td></tr><tr><td>TC-05</td><td>Condition check</td><td>PASS</td><td>Condition matched</td></tr><tr><td>TC-06</td><td>Reverse condition</td><td>PASS</td><td>Read-only reversed</td></tr><tr><td>TC-07</td><td>Multiple fields</td><td>PASS</td><td>All fields checked</td></tr><tr><td>TC-08</td><td>Incident save</td><td>PASS</td><td>Record saved correctly</td></tr></table>	Test Case	Scenario	Result	Validation	TC-01	Resolved state	PASS	Fields become read-only	TC-02	Open state	PASS	Fields remain editable	TC-03	Mandatory blank	PASS	Error message displayed	TC-04	Valid field	PASS	Submission accepted	TC-05	Condition check	PASS	Condition matched	TC-06	Reverse condition	PASS	Read-only reversed	TC-07	Multiple fields	PASS	All fields checked	TC-08	Incident save	PASS	Record saved correctly
Test Case	Scenario	Result	Validation																																				
TC-01	Resolved state	PASS	Fields become read-only																																				
TC-02	Open state	PASS	Fields remain editable																																				
TC-03	Mandatory blank	PASS	Error message displayed																																				
TC-04	Valid field	PASS	Submission accepted																																				
TC-05	Condition check	PASS	Condition matched																																				
TC-06	Reverse condition	PASS	Read-only reversed																																				
TC-07	Multiple fields	PASS	All fields checked																																				
TC-08	Incident save	PASS	Record saved correctly																																				
3.	Confidence Score (Only Yolo Projects) <i>Project equivalent: condition match</i>	Not applicable, as this is not a YOLO project. Condition detected - UI Policy conditions (for example State is Resolved) matched correctly in all tested incidents. Match rate - 100% (8/8); no wrong or missed conditions.	ServiceNow • Condition Validation UI Policy condition matching on Incident form Condition Match Results Configured condition State = Resolved Validation results <table><tr><td>Incident 001</td><td>State = Resolved</td><td>MATCHED</td></tr><tr><td>Incident 002</td><td>State = Resolved</td><td>MATCHED</td></tr><tr><td>Incident 003</td><td>State = Resolved</td><td>MATCHED</td></tr><tr><td>Incident 004</td><td>State = Resolved</td><td>MATCHED</td></tr><tr><td>Incident 005</td><td>State = Resolved</td><td>MATCHED</td></tr><tr><td>Incident 006</td><td>State = Resolved</td><td>MATCHED</td></tr><tr><td>Incident 007</td><td>State = Resolved</td><td>MATCHED</td></tr><tr><td>Incident 008</td><td>State = Resolved</td><td>MATCHED</td></tr></table> Match rate: 100% (8/8) • Wrong or missed conditions: 0	Incident 001	State = Resolved	MATCHED	Incident 002	State = Resolved	MATCHED	Incident 003	State = Resolved	MATCHED	Incident 004	State = Resolved	MATCHED	Incident 005	State = Resolved	MATCHED	Incident 006	State = Resolved	MATCHED	Incident 007	State = Resolved	MATCHED	Incident 008	State = Resolved	MATCHED
