

Project Design Phase Problem – Solution Fit Template

Date	03 October 2026
Team ID	SWTID-2026-6763
Project Name	Implement Client Script & UI Policy(Incident)
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem–Solution Fit means identifying a specific problem faced by users and ensuring that the proposed solution directly addresses it. For this project, it focuses on improving the **ServiceNow Incident form** by using **Client Scripts and UI Policies** to control form behavior, validate information, and make incident handling more efficient.

Purpose:

- ☐ Reduce errors while creating and updating Incident records.
- ☐ Automatically control field values and form behavior based on user actions.
- ☐ Make important fields mandatory, visible, or read-only when required.
- ☐ Improve the accuracy and consistency of Incident information.
- ☐ Provide a simple and user-friendly Incident form experience.
- ☐ Reduce unnecessary manual work by applying client-side automation.

Template:

Define the CS	1. CUSTOMER SEGMENT(S) CS ServiceNow IT Helpdesk Staff, Administrators and Incident Managers who create and manage incident records.	6. CUSTOMER CONSTRAINTS CC Manual validation is time-consuming and may result in missing, incorrect or inconsistent incident information, affecting incident processing.	5. AVAILABLE SOLUTIONS AS Manual field checking and validation by users, which can lead to inconsistent data and additional effort.	Explore the Solutions
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Ensure incident forms are completed correctly and consistently by controlling fields based on incident conditions, reducing errors and unnecessary manual work.	9. PROBLEM ROOT CAUSE RC Lack of dynamic field control and automated validation in Incident forms, resulting in unnecessary manual validation and inconsistent information.	7. BEHAVIOUR BE IT staff must enter incident information while the system dynamically controls field visibility, mandatory status and read-only behavior based on the selected conditions.	
Identify Timing & Triggers	3. TRIGGERS TR Creation or updating of an Incident ticket in ServiceNow.	10. YOUR SOLUTION SL Implement ServiceNow Client Scripts and UI Policies to dynamically control Incident form fields. Client Scripts handle client-side validation and behavior, while UI Policies make fields mandatory, visible or read-only based on specified conditions.	8. CHANNELS OF BEHAVIOUR CH 8.1 ONLINE: ServiceNow Platform / Service Portal. 8.2 OFFLINE: N/A – the process is completely digital.	Select and Define Cycles &
	4. EMOTIONS: BEFORE / AFTER EM Before: Confused and frustrated. After: Confident and comfortable with a clear, controlled and user-friendly incident form.
